What is a PCMH?
In the PCMH model, a primary care clinician or care team serves as the hub of patient care, coordinating the comprehensive needs of its patients. Studies have shown that PCMHs improve quality, reduce costs, improve patient experience and health outcomes. PCMH is a national quality recognition, with the most commonly-used standards and guidelines developed by the National Committee for Quality Assurance (NCQA). Becoming a PCMH promotes a supportive team-based culture for patients and staff, and better positions your office for new care delivery and payment models.

PCMH Benefits:
- Receive national recognition
- Promote high-quality, integrated primary care services
- Differentiate your office as a leader at the state and national level
- Improve clinical and financial performance
- Enhance team-based care
- Improve patient and staff satisfaction
- Align with quality-based incentive programs and payment models
- Improve workflow efficiency

Active use of EHR system for at least 3-6 months
Combined staff commitment of 4-5 hours per week
Designated Clinician Champion & Practice Staff PCMH Lead
Microsoft Office (or similar program)
Ability to complete NCQA requirements within 12-month timeframe
